# Phone Settings – Display and Brightness

IPhone Settings

You can change the appearance of your screen to either:
• **'Light'** which is a white background with dark text
or
• '**Dark'** which is black background with white text.

'Automatic' will change the 'Appearance'
Choose either
• Sunset to Sunrise, which uses your phone's location to change between light and dark appearance when the sun goes down, or
• set your own custom schedule. Your iPhone may wait to transition until you are not using your phone
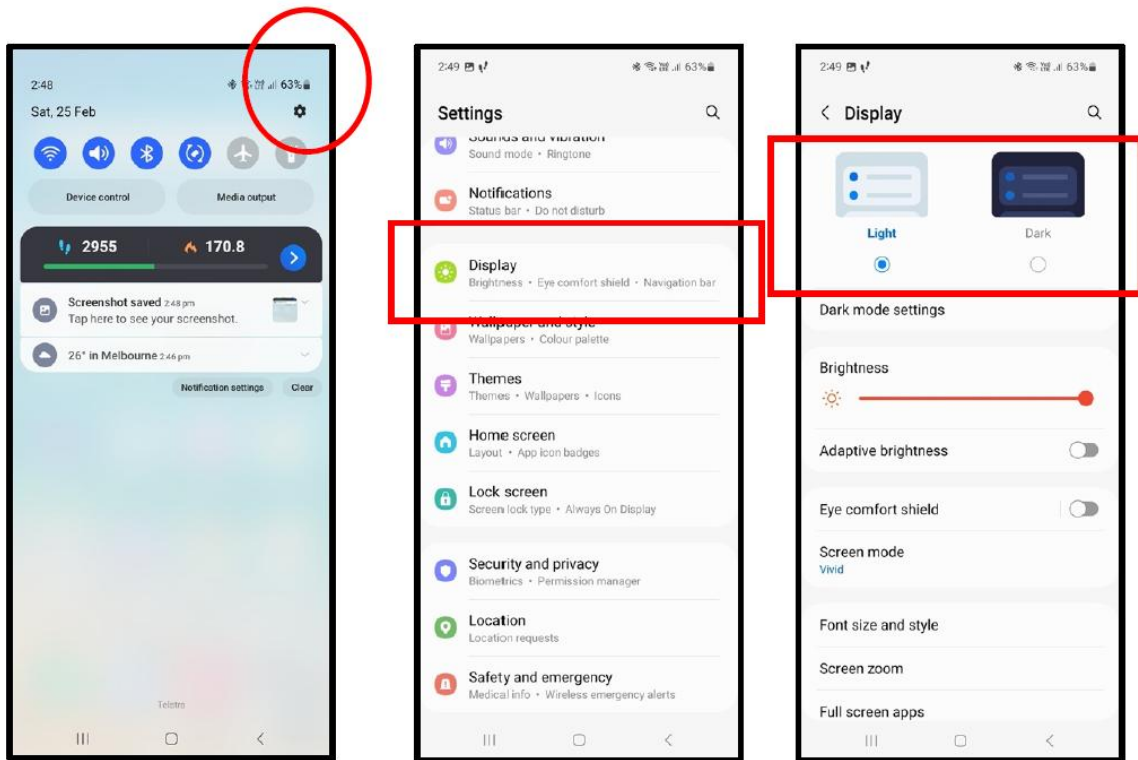

Text Size: You can change the size of the text to suit your preferred reading size. Slide the circle along the line to at the bottom to either increaseor decrease text size. You will see the text changing as you slide the circle. Simply stop sliding once you have selected your preferred text size. To return back to the Display & Brightness Settings menu simply tap the '<Back '(at top RH of screen).

Bold Text: Can be turned on or off depending on your preferred reading style.

Brightness: Simply slide the circle along the line until you have selected your preferred screen brightness
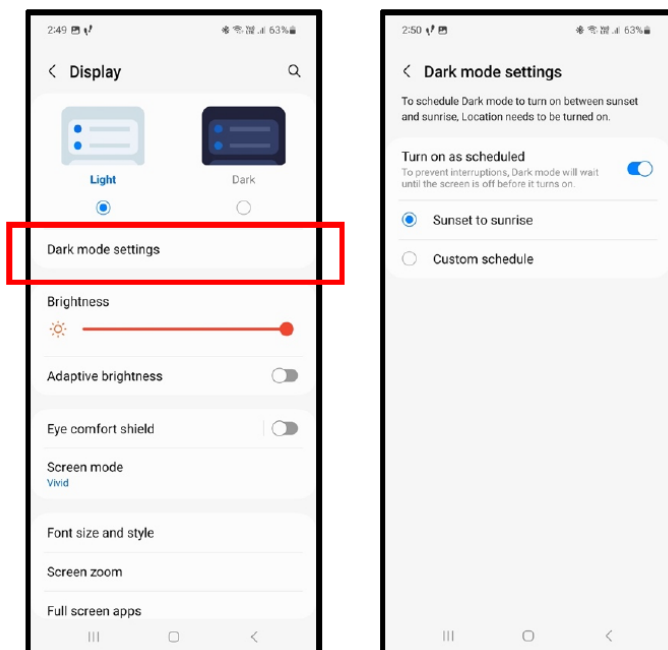

True Tone: Automatically adapts the display based on the ambient lighting conditions. This will make colours appear consistent across different environments.
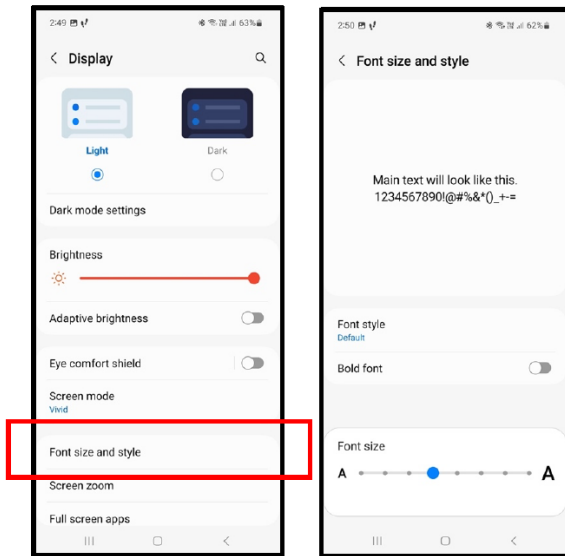

Android Settings – Display

You can change the appearance of your screen to either:
• **'Light'** which is a white background with dark text or
• '**Dark'** which is black background with white text.

'Dark Mode Settings' will change the 'Appearance' Choose either
• **Sunset to Sunrise**: uses your phone's location to change between light and dark appearance when the sun goes down
