

# iPhone Settings

**Aeroplane Mode** – stops your device sending and receiving calls and text messages (also known as flight mode).

**Wi-Fi** – tells you which network you're connected to plus all the networks within range. If there's a padlock icon next to it, it means you need the password.

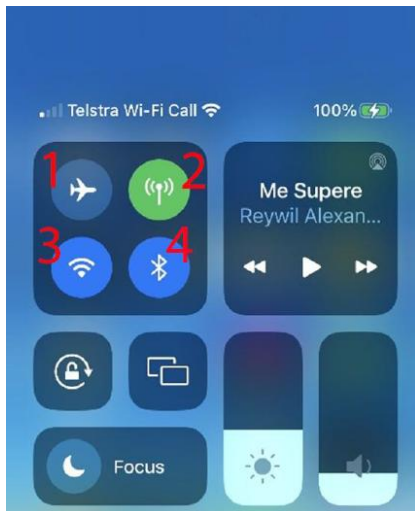

**Bluetooth** – allows you to connect Bluetooth device (speaker, AirPods, CarPlay, keyboard, mouse ...)

**Mobile data** – this allows you to turn on/off mobile data

**Personal hotspot** – provides internet access to other devices.

You'll need a password and if others want to join your personal hotspot they will need the password.

If you swipe down from the top-right corner of your screen, you'll be able to access this menu.

**1. Aeroplane Mode** – stops your device sending and receiving calls and text messages (also known as flight mode).

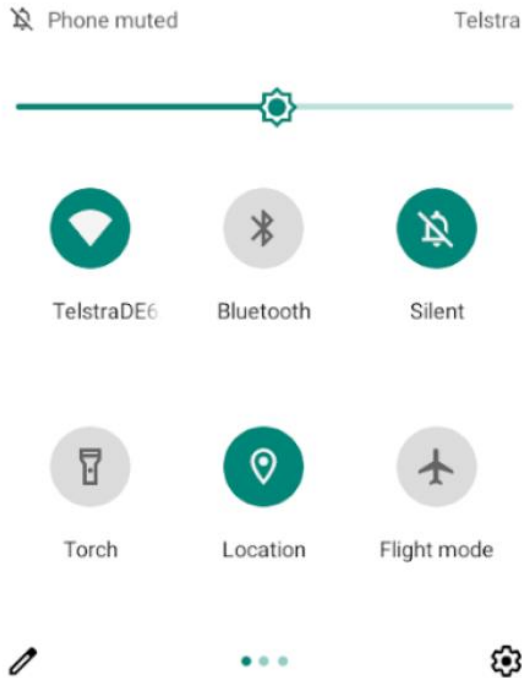

**2. Mobile data** – this allows you to turn on/off mobile data

**3. Wi-Fi** – tells you which network you're connected to plus all the networks within range. If there's a padlock icon next to it, it means you need the password.

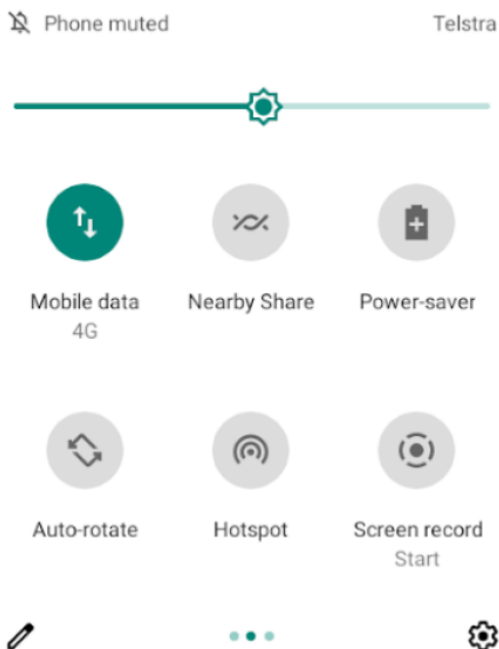

**4. Bluetooth** – allows you to connect to a Bluetooth device (speaker, AirPods, CarPlay, keyboards,

# Android Settings

Drag down from the top of the screen to access some of the options in the Settings menu.

**Wi-Fi** – you can turn your Wi-Fi on/off here  
**Bluetooth** – allows you to connect a Bluetooth device  
**Silent** – allows you to quickly put your phone in silent mode (or take it out of silent mode)  
**Torch** – very handy for finding things in the bottom of your handbag!  
**Location** – handy to have it on for particular apps (including find my device)  
**Flight mode** - stops your device sending and receiving calls and text messages. Turn it on/off here.

**Mobile data** – you can turn it on/off here  
**Nearby share** – share images/files with nearby devices (e.g. computer)  
**Power-saver** – allows you to do a range of things to save battery life  
**Auto-rotate** – means you don't have to turn your head to see photos that are sideways  
**Hotspot** – provides Wi-Fi access to other devices  
**Screen record** – records your screen. Saves the file in your Gallery
